CHILDREN AND YOUNG PEOPLE'S NEEDS ASSESSMENT 2019

DATA TABLES

LONDON BOROUGH OF RICHMOND UPON THAMES

Contents

Methodology

Richmond: London Borough of Richmond Upon Thames

Kingston: The Royal Borough of Kingston Upon Thames

Outer London:

- DfE LAIT: Barking and Dagenham, Barnet, Bexley, Brent, Bromley, Croydon, Ealing, Enfield, Greenwich, Harrow, Havering, Hillingdon, Hounslow, Kingston upon Thames, Merton, Redbridge, Richmond upon Thames, Sutton, Waltham Forest

Local data has been used to provide the most accurate estimates, note this data is provisional and caution on its use is advised

Published data is snapshot from source as at June 2019. For most current data refer to source.

Data highlighted in purple indicates that the data has been used within the summary document.

Population

NOTE: Please be aware that where GLA population projections have been used, these figures are correct to the nearest 100 as per publication rules.

Total population 18 or under by age

Age Group	Area	Number	% of total population	% of 0-18 population
Total population 18 or under				
0-4	Richmond	12,624	6.4%	26.6%
	Kingston	11,291	6.4%	27.6%
	London	615,881	6.9%	29.1%
	England	3,346,727	6.0%	26.6%
5-9	Richmond	14,297	7.3%	30.1%
	Kingston	11,896	6.8%	29.1%
	London	599,855	6.7%	28.3%
	England	3,523,866	6.3%	28.0%
10-14	Richmond	12,290	6.2%	25.9%
	Kingston	10,478	6.0%	25.6%
	London	524,126	5.9%	24.8%
	England	3,274,119	5.8%	26.0%
15-18	Richmond	8,272	4.2%	17.4%
	Kingston	7,196	4.1%	17.6%
	London	377,124	4.2%	17.8%
	England	2,440,142	4.4%	19.4%
Total 0-18	Richmond	47,483	24.1%	-
	Kingston	40,861	23.3%	-
	London	2,116,986	23.8%	-
	England	12,584,854	22.5%	-

Office of National Statistics, Conception and Fertility Rates

Maternal mental health

It is estimated that up to 20% of women develop a mental illness during pregnancy or within the first year after having a baby. By applying national prevalence estimates to maternity data for 2017/18, we would expect the following:

Disorder	National Prevalence estimate	Richmond prevalence estimate 2017/18
Mild to moderate depressive illness and anxiety in perinatal period	100-150 per 1,000	182 to 273 women
Adjustment disorders and distress in perinatal period	150-300 per 1,000	273 to 547 women
Post-traumatic stress disorder in perinatal period	30 per 1,000	55 women
Severe depressive illness in perinatal period	30 per 1,000	55 women
Chronic serious mental illness in perinatal period	2 per 1,000	4 women
Postpartum psychosis	2 per 1,000	4 women

Disorder	National Prevalence estimate	Kingston prevalence estimate 2017/18
Mild to moderate depressive illness and anxiety in perinatal period	100-150 per 1,000	163 to 245 women
Adjustment disorders and distress in perinatal period	150-300 per 1,000	245 to 489 women
Post-traumatic stress disorder in perinatal period	30 per 1,000	49 women
Severe depressive illness in perinatal period	30 per 1,000	49 women
Chronic serious mental illness in perinatal period	2 per 1,000	3 women
Postpartum psychosis	2 per 1,000	3 women

0-15 rate	0.6%	0.0%	0.1%
16-24 count	529	74	41
16-24 rate	3.3%	0.5%	0.3%
Total population rate	6.3%	0.9%	1.3%

ONS Census 2011 (via Nomis)

The 2011 census identified that there are 864 carers in Richmond upon Thames aged younger than 24 years who provide unpaid family care, and as of 2018 this figure is estimated to be 970 Greater London Authority. (2017a). *2016-based population projections: Central Trend-based projection (using a 10-year migration scenario)*

In September 2018 480 young carers were being supported by the Richmond Carers Centre whereas this was 458 in December 2018. *LSCB data 2018-9:*

Based on information from the Richmond Carers Centre a greater proportion of young carers are from ethnic minority groups than the average for all carers within the borough (29% of young carers compared to 13% of all carers identified by the 2011 census).

The 2014 Richmond Young People's Survey showed that 11% of pupils in year 5, 6 and 7, and 7% of pupils in year 8 and 10, reported that they care for someone at home on a regular basis who is unable to care for themselves. Only 1% felt this often stopped them from taking part in recreational activities, and 3% felt it sometimes stopped them. Elsewhere, the Young Carers in Schools initiative estimates that nationally as many as one in 12 pupils could be a young carer (85). https://carers.org/young-carers-schools.

Estimated prevalence between 8-11%: pupils: 2127 – 2925. Based on 26599 pupils in Richmond schools (excluding pupils attending special schools)

CAVEAT: Published figures (row 1) relate to total confirmed <u>victims</u> of offences and are included for context. Incident figures are not published and relate to unique instances of crime. A single incident/instance of crime may have more than one victim. Denominators vary across each measure shown depending on the availability and accurate recording of data e.g. a single incident may record the age of the victim, but not the age of the suspect, in which case the incident would be counted within row 2, but not rows 3 and 4

Children Affected by Domestic Violence

Number of cases discussed by multi agency risk assessment conference where children have been identified (Richmond)			
Year	No. of MARAC Cases	Number of children identified	Rate of children per case
2012-13	229	206	0.90
2013-14	207	225	1.09
2014-15	199	206	1.04
2015-16	228	214	0.94
2016-17	249	255	1.02
2017-18	251	259	1.03
2018-19	230	252	1.10

Source: Richmond MARAC July 2017

The Richmond MARAC manages those cases of domestic violence which have been identified as posing the highest risk of harm. Supplementary data is collected on all cases, including the number of children in each household. The rate of children per case has increased over the past 4 years.

Estimated number of children affected by domestic violence (Richmond)			
Year	Rate of children per MARAC case	Total Domestic Violence	Estimated Children Affected
2014-15	1.03	875	906
2015-16	1.07	1066	1001
2016-17	1.02	1085	1111
2017-18	1.03	1248	1288
2018-19	1.10	1211	1327

Source (Domestic Violence figures): MPS Crime Dashboard

A crude application of the rate of children per MARAC case to the published domestic violence crime totals of the past 5 years indicates an increase in the estimated number of children affected, as domestic violence has increased but almost 40% in that time.

The MARVE (Multi Agency Risk, Vulnerability and Exploitation) panel monitors children considered to be at risk of or subject to CSE and CCE (criminal exploitation) and replaced the MASE panel from November 2018.

2018-19 (MARVE & MASE)	2017-18 (MASE)
• 10 Richmond young people (all female) were referred to MASE/ MARVE between April 2018 and March 2019 due to CSE concerns, 8 of whom were monitored by the panel. • Concerns for the others did not meet the threshold for monitoring by MARVE. • The age range was from 13 to 17 years. • 70% are White and 30% from BAME backgrounds	• In the same period of 2017-18, 25 young people (88% female) were referred to Richmond MASE panel due to CSE concerns, 20 of whom were monitored by the panel. • Concerns for the others did not meet the threshold for monitoring by MASE. • Ages ranged from 12 to 17 at initial MASE meeting • 76% are White and 24% from BAME backgrounds

- There have not been any children referred to the MASE/ MARVE who were at risk of or subject to FGM or honour based violence
- However, single assessments now capture data relating to FGM risk factors (Factor 22A) and abuse linked to faith or belief (Factor 23A). Provisional 2018/19 data shows that:
  - fewer than 5 children had 22A identified as a factor
  - 11 children had 23A identified as a factor

Gangs, guns and knives

The Knife Crime Prevention Programme (KCPP) is an intervention which aims to reduce the prevalence of knife carrying and use by young people. Young people are referred to the programme if they are aged between 10 and 17 and have been convicted of an offence where a knife or the threat of a knife is a feature. In 2018-9 less than 5 young people qualified for the KCPP in Richmond, whereas there were less than 5 in Kingston. (*AfC YJB Performance tracker Q4*)

1. Under section 184, if a housing authority has reason to believe that a person applying to the housing authority for accommodation, or assistance in obtaining accommodation, may be homeless or threatened with homelessness, it must make inquiries to satisfy itself whether the applicant is eligible for assistance and if so, what duties are owed to that person.
2. It should be noted that the presence of children within a household presenting as homeless will accord that household an automatic priority need.

3. *16% of the positive decisions received by families with children were instances where homelessness was prevented.*

Overcrowded households

Children living in overcrowded households			
Area	No. of households with dependent children	No. of overcrowded households with dependent children	Percentage of households with dependent children that are overcrowded
Richmond	23,648	1,867	7.9%
Kingston	19,684	2,284	11.6%
London	1,009,843	238,038	23.6%
England	6,423,941	697,901	9.2%

2011 Census
