

Kew Ward Community Conversation Notes

Date: Mon 19th Nov Time: 6.30 – 9.00pm Venue: The Avenue Club, St Lukes. Kew

Ward members:

- Cllr J F Burford: Liberal Democrat Party. Assistant Cabinet Member for Arts, Culture and Sport
- Cllr Lotte Campanale: Liberal Democrat Party
- Cllr Ian Craigie: Liberal Democrat Party. Assistant Cabinet Member for Finance and Performance

Local Questions

Headline Topic: Road accidents attributing to 20mph – 30mph			
Question 1	How many significant road accidents have there been in the Borough, which have been attributed to a vehicle travelling		
	between 20 mph and 30 mph, in the last few years?		
Response	We currently don't have that data. I will say that the faster a vehicle is going the more impact and severity of the accident.		
Actions to	Details on data to be found on accidents that have been	By whom: Cllr Ehmann	
be taken	attributed to a vehicle travelling between 20 mph and 30 mph		
	in the last few years across the borough.		
Headline Top	Headline Topic: Village Planning		
Question 2	I would be interested to find out why the Council is scrapping Village Planning as this seems to have been a very positive thing.		
	What is intended to replace it? Why? How much money was spent consulting on and implementing the Village Planning		

	schemes and Supplementary Planning Documents, will this now be wasted? Please explain what the benefits of the new		
	scheme will be.		
Response	Cllr Burford: With these Community Conversations we are looking at asking the community what they would like to see		
пеоропос	happen in their own wards.		
	Resident: What are you proposing that is different to the Village plans? You are going back to Wards - part of Kew SPD		
	includes North Richmond – how are you going to marry these two different areas up? How will Ward based conversa work when part of North Richmond SPD is in Kew?		
	Cllr Burford: Yes, we are going back to Ward based discussions. Every Ward will have its own separate conversation. I'm not		
	too sure how the Kew SPD links up with North Richmond.		
Actions to	Look into the ward boundaries and SPD for Kew relating to By whom: Cllr Burford		
be taken	North Richmond.		
	pic: Waste collection noise		
Question 3	I applaud the Council's support for the campaign against the disturbance caused by Heathrow and especially night flights.		
	However, the other main source of early morning disturbance is caused by the Council itself, whose dustcarts wake us up		
	every Tuesday morning at around 6.30am. When are the waste collection arrangements next due to be retendered and when		
	they are will some consideration be given to a later start? I would like to see more doorstep recycling as well, and more		
	plastic recycled.		
Response	Cllr Craigie: The Council is currently in the process of preparing tender documentation for a new waste and recycling collection		
	contract to commence in April 2020. I understand the complaint around early morning collections which happen to avoid		
	traffic congestion on the road network. Currently the collections are set to happen before the morning rush hour period.		
	Whilst there are no plans to change the commencement time for such operations, the contract will focus on asking how the		
	contractor will mitigate noise generation resulting from unnecessary activities such as loud verbal discussion and the		
	collections operations. This will include consideration of available vehicle technology to reduce engine and operational noise.		
	We are aware of insufficient boxes and labelling and are working on a communication strategy for this.		
Headline Top	pic: Sandycombe Road proposal		
Question 4	What is the outcome of the proposed scheme that was presented by the Council to create new a layout for cars, lorries and		
	pedestrians to Kew Gardens station forecourt and the area leading down to the pedestrian crossing on Sandycombe Road?		
	Not forgetting the problem to solve the excessive water settling in the station forecourt after a downpour.		
Response	Cllr Burford: It was a very small consultation; the Traders Association were not consulted, and Kew Society and the Royal		
	Botanical Gardens were not in support of the proposals. We need to re-consult Kew as a whole. 100 people responded to the		

both the short term and long term. Cllr Campanale: There was no consideration given to the school buses that use the area for turning. The issue of land ownership has now been solved regarding the puddle, so we can now look at getting this sorted. We are working with the Royal Botanical Gardens on better and more appropriate signage around the station. Headline Topic: Air pollution Question 5 Are any surveys being done concerning air pollution around the main roads in Kew - e.g. the South Circular and Kew Road. If levels are unacceptably high, is anything being done about it? I know this is not a new concern but would like to know the most recent information. Response Cllr Campanale: The data is on our annual reports on the council website. We are currently re-writing the Air Quality Action plan as we didn't feel it was robust enough. I am promoting green walls and I have attended a scrutiny day with other London Boroughs and have learnt what they are doing. A lot is about reducing vehicles to 20 mph. It's important that we all play our part in tackling air pollution through the way in which we travel, the deliveries to our homes and the vehicles that we use. Headline Topic: Mobile phone reception Question 6 Mobile reception in some parts of Kew is very poor or even non-existent. How is the Council reacting to the suggestion (made by the Kew Society) that it might take "a more proactive planning stance" to rectify the situation? Response Cllr Burford: Yes, it is a nightmare, including Wi-Fi and broadband etc. EE masts have had a lot of negative feedback from residents regarding their placement. We need to work with officers and suppliers to find the best area to place these masts. Actions to be taken Response Cllr Campanale: Each application is looked at by planning officers but residents object to them. We have embraced Kew Societies advice on where best to place these masts. Cllr Burford: Suppliers put in applications all the time. In the last 3 years there have been 4 planning applications for mast				
Cllr Campanale: There was no consideration given to the school buses that use the area for turning. The issue of land ownership has now been solved regarding the puddle, so we can now look at getting this sorted. Question 7	We understand that Officers are working on a parking consultation around Kew Green and the surrounding area due to the
	Brentford development. Please could you let us know the roads which will be included in this consultation and the time frame
	for completion and implementation of any CPZ
Response	Cllr Cragie: We are aware of the issues with parking and that some roads do not have CPZs. We have provisionally agreed with the London Borough of Hounslow for a proportion (£50,000) of the Section 106 agreement in respect of the Brentford Footbal Club development. This payment is expected to be received in early April 2019. We have no firm dates yet for the
	commencement / completion of a study in this area. Once payment is received, we will look to programme the work for 2019/20 financial year.
	Residents: Which roads are involved? Do households need to go to the council to request the CPZs
	Cllr Craigie: We need to look at this as a whole and see where the main problems lie.
	Cllr Burford: Councillors are aware of the roads that need to be featured in the consultation for CPZs
Headline Top	pic: Notices pinned to trees
Question 8	We have a subject which we hope might be discussed at the Kew Community Conversation on 19th, November. This is the proliferation of notices, announcements and commercial advertisements that are being pinned to the trees in Kew Village and the surrounding area. We sometimes remove out-of-date announcements and blatantly commercial posters from the trees and dig out drawing pins which are often rusty and damage the bark. Some posters are stuck to lamp posts making them extremely difficult to remove. Four things seem to us to be necessary: 1. Organisations should be made aware that they are responsible for removing out-of-date announcements that they have displayed in public areas. 2. People should be encouraged to be aware that these attachments are unattractive and do not enhance the pleasant village atmosphere (and the trees do not like it). 3. Commercial interests should be encouraged to use paid for announcements in shop windows. 4. More strategically placed public notice boards should be installed.
Response	Cllr Campanale: Ideally posters go onto the council community notice board via the library. Kew Society have got the funding for a community notice board which will hopefully help to alleviate this problem. Cllr Burford: Kew is a very small place, most of us know who puts these notices up – we need to encourage people to be more organic, using string etc and we also need to self-police this.

Question 9	Road safety on Mortlake Road - large lorries have hit the bridge. LBRuT have given extensions to two schools in this area, it is		
	not safe.		
Response	Cllr Campanale: We have inherited this problem, Sat Navs were giving wrong information and signage was incorrect. We have		
	fast tracked this.		
	Resident: Signage for lorries regarding height restrictions are in the wrong place, they are at the point of no return. They need		
	to be placed earlier on the road.		
	Cllr Campanale: I agree. Resident: I brought this up with last administration Cllr Burford: We will take this up with TfL Resident: TfL have no budget		
Actions to	Look into moving the signage	By whom: Cllr Ehmann / Cllr Burford	
be Taken			
	Topic: Road surface repairs		
Question	The road surface repairs are very poor. The £700,000 for 20mph should be spent on road repairs and junction improvements.		
10			
Response	Cllr Ehmann: Funding for 20mph is through LIP funding so we ca	an't use it for road resurfacing. Funding has not been scrapped	
	for road repairs. Cllr Campanale: We submitted the top 3 roads in each ward to have repairs carried out on them within a week of being in		
	administration. The Roads and Pavement Fund has now been scrapped and repairs will be prioritised by need now.		
Actions to	Roads in each Ward to be publicised	By whom: Cllr Campanale	
be Taken			
-	pic: A316 road safety		
Question	A316 road safety – there has been an increase in people crossing the roads and not using bridges. This is very unsafe.		
11			
Response	Cllr Campanale: TfL are looking at this bridge as there is a construction issues with it.		
•	ne Topic: Recycling		
Question	Recycling – in the last 3 months I have taken bins to the refuge centre to get them emptied as they have not been emptied.		
12	RHP have direct communication with their residents but not with the other Resident Associations in the area - this is breaking		
	down the community operation.		
Response	Cllr Campanale: You can report a missed recycling collection by via email or phone. I can help you out with this.		

	There is a Tenants Champion at the council who can liaise with	RHP.
Headline Question: Kew Gardens Station		
Question	Kew gardens station: TfL are unresponsive – we need step-free access and the under-pass is not fit for purpose as it floods and	
13	is very slippery.	
Response	Cllr Craigie: The station is a listed building in a conservation area. We can and will lobby TfL.	
Actions to	Discuss issues with TfL around Kew Gardens Station	By whom: Cllr Craigie
be Taken		

20 mph consultation Questions from the floor

Headline Topic: Enforcement of 20mph			
Question 1	I haven't seen police enforcing speed limits in the borough for a long time. The issues are that there are too many cars and		
	not enough space on the road – speed of vehicles doesn't make it safer. We need more quiet ways and a better cycle		
	network.		
Response	Cllr Ehmann: We will look broadly at cycle infrastructure. Both Richmond and London cycling campaign have said that 20mph		
	will make the road environment less hostile and therefore make a difference. If anyone moves from driving to public		
	transport or cycling that is a success. Enforcement is down to the police.		
Headline Top	Headline Topic: Co2 emissions		
Question 2	Co2 emissions – my understanding is that these increase for petrol cars if you decrease from 30 – 20mph.		
Response	Cllr Ehmann: The pollution caused by acceleration and deceleration makes up for this in air pollution. We will be recording		
	figures on speed and air quality as well if we implement this.		
Action to	Record figures on speed and air quality if 20mph	By whom: Cllr Ehmann	
be taken	implemented		
Headline Topic: Cyclists overtaking cars			
Question 4	Make Air Safe and Clean group (MASC) – we have discussed this and on balance we support this. The speed limit in Richmond		
	Park is 20mph and I'm permanently being over taken by cyclist – surely this will make out roads more dangerous?		

Response	Cllr Ehmann: I expect all roads users to observe the speed limits. When cyclists hit people, it has less impact than if a car hits someone at speed. I want to create an environment where all people are confident in cycling on the roads and 20mph will support this.	
Headline Topic: Air quality and idling in their vehicles		
Question 5	Air quality and safety are related to people idling in their vehicles. What is being done about this?	
Response	Cllr Campanale: We are re-writing our Air quality action plan. We are very shortly going to be acting on vehicles idling.
