

Be kind to the trees They are busy saving the World

„If many people use the bike, the air is not so dirty!“

„If there are no leaves, we can't breathe and have no fresh air inside our body!“

„Weil sonst sterben wir (we would die). To ride a bike is good for the nature, because cars produce those exhaust fumes!“

„To have fresh air! Because we would be dead or sick if we wouldn't have fresh air!“

What can we do to make the air better?

Why do we need clean air?

Our bodies need clean air!“

„Using the bike more often.“
By making more leaves.“

„We need clean air to breathe air!“

„We need good air, so we don't die!“

„In the Winter time the air is not so clean, because the leaves give the people air!“

„Because we need fresh air! If the leaves are gone we won't have fresh air!“

„Clean air day means, that this is the day the trees suck in most of the bad air! Yes, after that we can breathe better!“
