* Update - We acknowledge spreadsheet formula issues that resulted in not all the properly counted and allocated votes being included in the announcement on the night in the Richmond Park election count for the General Election 2024. This has affected the order of the results, with the Green Party candidate now in fourth place and the Reform UK candidate in fifth. It has not affected the declared outcome of the election which remains on the Richmond Park results page. The error was an isolated incident we are taking this opportunity to review processes with a particular focus on spreadsheet procedures.
