

List of trees already planted 2023 – 2024 Season

Below is a list of trees that have been planted since November last year, totalling 433 as of the 25th of March 2024. We will be planting many more over the next couple of months, aiming to plant c800 trees before the end of this planting season.

And a final note on looking after the trees that we have planted:

Our specialist Arborist contractor carries out a programme of watering, which typically begins in April and continues throughout the growing season. We have a baseline watering frequency of ten visits per year. However, this is dependent upon weather conditions, so during hot and dry spells we operate increased watering regimes. We will monitor the condition of the tree to ensure that it is receiving adequate aftercare.

Additionally, many residents kindly keep an eye on our newly planted trees after they are planted. If you are keen to help these trees survive and thrive, especially throughout the unprecedented high temperatures we are and will likely continue to experience during the summer months, we very much welcome your efforts. Information on how to water our street trees can be found on our Tree Planting and Watering web page.

Despite these efforts, not all newly planted trees will survive. Richmond Council has a high planting success rate and failure of trees is uncommon. However, despite our best efforts to keep young trees alive through our regimen of watering, occasionally they do not make it. Rest assured, any trees that do fail during the three-year period following planting are replaced under contract guarantee, at no additional cost to the taxpayer.
